---

Construction Management Executive and Consultant with over 48 years experience in all levels of engineering and management positions up to Senior Vice President of Operations and Consultant to the construction and materials industries.

Construction project involvement has included highways, airports, canals, dams, military installations, and major private developments. The epitome of my construction management experience was as the Project Manager for the joint venture of Kasler, Continental-Heller and Fruin-Colon (KCF) on building the West Coast Space Shuttle Launch and Recovery facilities on Vandenberg Air Force Base in California.

Construction management consulting efforts have included work on corporate mergers, acquisitions, dispositions, reorganizations and market development, with emphasis in construction materials organizations including source acquisition and development.

In semi-retirement industry involvement has been Alternative Dispute Resolution efforts that have included serving on Dispute Review Boards (in excess of one hundred since 1995) for the State of California and the U.S. Bureau of Reclamation. Expert Witness efforts have included services for both government and private parties.

Traditional industry involvement has included affiliation with Associated General Contractors (AGC) serving on labor negotiation and specification committees, Construction Materials Association of California (CMAC) serving as industry liason in Central and Coastal counties divisions, and finally on the State Contractors License Board as an 'Industry Expert'.

Non-traditional industry involvement has included developing and presenting claim development seminars for major California Contractors.

Education and licensing includes a Bachelor of Science Degree in Civil Engineering with a minor in Geological Engineering from the University of California, Berkeley, Certification in Site Assessment and Remediation for Hazardous Materials from the University of California, Davis, and California contractor licenses for General Engineering and Building, and Hazardous Material Management.
